

## **MAD Progress Report**

**March 2020**

The month of March has thrown a curve at all of us in the Village. For its part, Enhance La Jolla has authorized the Maintenance Assessment District vendors to continue their work in the Village.

The reasoning for this decision is simple. All work performed by MAD enhances the cleanliness of the Village. And, MAD's vendors are complying with the Governor's Executive Orders and County/City directives regarding distancing and the use of gloves and masks. Enhance La Jolla believes that these efforts provide a significant benefit to all people working and living in the Village. A clean environment is a worthy goal.

MAD will continue to power wash sidewalks, maintain landscaping and pick up fallen limbs and other debris from trees, and provide litter control and trash collection regularly within the Village. All trash receptacles are disinfected and lids wiped during each servicing.

Painting trash receptacles (lids and frames) continues and will be completed this month.

Other anticipated activities have been placed on hold. Once conditions allow, MAD will restart its efforts to improve tree wells, paint SDG&E transformers, and recondition wood benches.

Also, Enhance La Jolla will also implement a doggie waste station pilot within the Village.

Lastly, some good news. MAD is coordinating with one of our neighbors to remove graffiti. The results have been remarkable. Virtually all of these eyesores have been removed. So, if you see any graffiti, don't hesitate to notify MAD. And, thank you to the good will of our new contributor to the enhancement of the Village.

As always, your input, comments, and concerns are welcome. You can contact MAD at [manager@enhancelajolla.org](mailto:manager@enhancelajolla.org) or at 858-444-5892 any time.

John Unbewust, District Manager
